Full-Stack Software Engineer with 4+ years of healthcare technology experience and 9 years of application development history. Proven track record of delivering web and cross-platform mobile features and scalable backend systems, monitoring system health and leveraging generative AI to accelerate delivery.

TECHNICAL SKILLS

Languages + Frameworks: JavaScript, TypeScript, Java, React Native, React.js, Next.js, Angular, Vue.js, Spring Boot, Node.js, Express.js. **Data + Cloud:** PostgreSQL, MySQL, Sequelize, Apollo GraphQL, REST APIs, AWS, Azure. **Testing, Tools + Monitoring:** GitHub Copilot, Splunk, Datadog, Cypress, JUnit, Jest, Git.

PROFESSIONAL EXPERIENCE

Optum Technology | Software Engineer Chicago, IL | May 2023 – Present

- Drive end-to-end engineering for a critical microproduct powering a React Native consumer mobile app, leveraging GitHub Copilot to accelerate UI component creation and backend API integration.
- Serve as the primary technical owner for an Apollo GraphQL subgraph, managing end-to-end delivery, vulnerability remediation, and Datadog/Splunk health monitoring.
- Spearhead the cross-functional architecture and migration of a legacy web scheduling repository into a modernized React stack, implementing reusable design libraries to align with product design systems.
- Implement scalable backend API endpoints using Java to support data flow for web and mobile users.

Optum Technology | Technology Development Program Associate Chicago, IL | May 2022 – May 2023

- Led integration of Cypress automation testing into core codebase, reducing manual QA time.
- Collaborated with cross-functional devs to build admin tools using Angular and API integrations.
- Enhanced and maintained utility management web application using Angular and Camunda.

WTTW-Channel 11 | WTTW News Digital Editor Chicago, IL | July 2015 – Oct. 2021

- Scaled average monthly users by more than 800% through product optimization.
 - Managed a team of digital content producers to increase user engagement and digital retention.
 - Programmed and edited the site layout using Drupal; built out custom interactive voter guides.
-

TECHNICAL PROJECTS

Baby Green ([Live](#) | [GitHub](#)) Full-Stack Developer

- Built a houseplant health tracker integrating Cloudinary API; deployed via Heroku and Netlify

Bird Nerds ([GitHub](#)) Full-Stack Developer

- Collaborated on an agile team to build a bird-tracking app with Java Spring Boot and Vue.js.
-

CERTIFICATES + EDUCATION

Certifications: Microsoft: Azure Fundamentals (2024) | Tech Elevator: Java Full-Stack (2022) | Northwestern University: Full Stack Web Development (2017). **Education:** University of Illinois: Bachelor of Arts.
